

Expedited Ground

The expedited truck market demands capacity coupled with capability, experience, and flexibility. LINQ meets these demands with a dedicated fleet of independent business owners and all equipped with GPS satellite tracking. Our Global Positioning System allows us to locate your shipment to within 1/10th of a mile at any time. Our state of the art technology tracks each shipment and proactively alerts our customer service team on the status of your shipment. Additionally, at your option, our technology systems will send automated shipment status updates to individuals of your choice, using automated email or automated fax.

LINQ Transport

To further enhance our capacity, LINQ has developed alliances with expedited carriers across North America. Each carrier is pre-qualified and approved to meet our exacting service standards. At LINQ we can track and trace any shipment around the world and report back to you within minutes.

Our combination of dedicated fleet capacity and our partner carriers provides LINQ access to over 10,000 tractor-trailers, straight trucks and cargo vans positioned to meet the needs of our customer's expedited truck freight service requirements.
