LINQ TRANSPORT

Less Than Truckload (LTL)

ONLINE   ON TIME

Smaller freight loads are best transported via LTL (less than truckload). The carriers that provide these services are networked nationwide. LINQ has found that our discounts are much greater than if you were to work with the carrier directly. LINQ provides seamless LTL shipping solutions throughout North America. You can count on us for all of your regional, super regional, and national LTL shipping needs.

We offer a multitude of cost-effective one and two day lanes, fast and efficient long-haul service, and guaranteed and urgent services for LTL shipments needing expedited transit times. We also offer specialty solutions to meet your specific shipping requirements.

LTL Guaranteed Delivery

With our full service online shipping tool, Access Manager, you can get quotes, compare pricing, and book your load online. Quoting is always free. No hidden charges, and there will be no surprises when you receive your bill. Feel free to contact us for a log on and password to get you going today.
